

---

## Thema

The underlying idea is always customer orientation and continuous progress.

---

## Thema's Identity

Thema is an Italian company specialising in the design and creation of customised solutions for doors and windows, façades and structures in steel and aluminium for any type of building, from simple houses to more complex constructions.

**Tailor-made solutions that meet all requirements in terms of noise, design and heat, through careful, cutting-edge design direction, from engineering through to creation and after-sales service.**

Thema integrates experimentation, technology, bespoke manufacturing, together with analytical and creative capabilities. We provide cladding for comprehensive, ambitious buildings developed to size: specially conceived systems, born of Thema expertise, and of customer needs and inspiration.

We do this with a method, MetodoThema©, a design process developed over years of experience.

Founded in Verano Brianza (MB) in 2008, Thema works in **office&building, hospitality, residential, public space,** and **retail buildings**, with different-scale projects that are created in partnership with architects, designers and international businesses.

## The project

To renew the SEW campus, Solaro, Lombardini22 conceived the renovation of a block of offices with the addition of a new rectangular body connected to the existing one, all brought together in a new image façade.

A new façade system has been devised and developed, joining the old to the new building to create a seamless image for the overall complex.

Made by Thema, the sequence of innovative vertical brise-soleils with aluminium honeycomb – in variable sizes to create a totally custom-made wave effect - are a clear reference to speed and to the engines made by SEW.
